

Answers to questions regarding the use of InBody 3.0 in a better hotel:
Interconti Grand Seoul, Korea, July 2003

By S. S. Kim

Metropolitan Fitness Club Manager, Interconti Grand Seoul, Korea

1. All clients who are our hotel room guests and fitness club members are available to use this instrument.
2. Most of our fitness club members measure their body composition every 3~6months.
3. Most of clients who have used InBody are satisfied with it.
The exercise program is being planned by this InBody result.
As they see the changed result, they estimate their present health status.
4. Our club has accumulated each result so it is available to compare previous result with present result when the member who checked InBody come again.
Average 5-10 members use this instrument in a day.
5. I would like to recommend this instrument to INTERCONTI HOTELS personally.
But it is difficult to answer it that other INTERCONTI HOTELS can be available to have this instrument since each country has different situation.
